

ALS Multidisciplinary Clinics

What is a Multidisciplinary Clinic?

Comprehensive multidisciplinary care is proven to help people live longer and better with ALS, and is key to finding an effective treatment and cure.

Our evidence-based multidisciplinary clinic care model brings together a team of health care professionals, from a variety of disciplines, allowing people with ALS to attend a “one stop shop” and receive care from each discipline during a single visit, typically scheduled on a quarterly basis.

The ALS Association Golden West Chapter collaborates with physicians and clinics throughout our service area to help ensure that people living with ALS have access to specialized clinical care. The ALS Association’s Certified Treatment Centers of Excellence and Recognized Treatment Centers provide compassionate, professional care in a supportive atmosphere.

What to Expect

The clinical care team typically includes a neurologist, physical therapist, occupational therapist, respiratory therapist, nurse, dietitian, speech language pathologist, social worker, mental health professional and an ALS Association Golden West Chapter Care Manager. A clinic visit may last 3 to 5 hours, allowing people to consult with most, if not all, of the clinic team members.

What to Bring

- Medical records, if it is your first visit
- A record of symptoms and changes
- List of current medications and doses
- Completed paperwork requested by the clinic
- Questions you have for members of the team

The Golden West Chapter partners with ALS multidisciplinary clinics throughout our service area, and is adding new partners all the time. See reverse side for a listing of our current clinic partners.

Chapter Care Managers are members of the clinic team who:

- Coordinate care plans with care providers in the home and community
- Facilitate equipment loans
- Demonstrate low tech solutions to address communication challenges
- Connect families to resources and support in the community
- Provide information about Chapter programs and events

See reverse side for listing of Golden West Chapter affiliated multidisciplinary clinics

The ALS Association Golden West Chapter

The ALS Association's **Certified Centers of Excellence (CTCE)** provide evidence-based, multidisciplinary ALS clinical care and meet The ALS Association's clinical care and treatment standards, which are based on the American Academy of Neurology (AAN) Practice Parameters. These clinics participate in ALS-related research and successfully complete a comprehensive site review to be certified as a center of excellence. The ALS Association's **Recognized Treatment Centers (RTC)** have the same high quality approach to multidisciplinary care as The ALS Association Certified Treatment Centers of Excellence; however, they may not conduct onsite research or opportunities to participate in clinical trials. The Golden West Chapter is proud to partner with **Affiliated Clinics (AC)** across our service to provide quality professional multidisciplinary clinical care.

Center for ALS Care at Cedars-Sinai (CTCE)
